## **Silent Spirit now compatible to Intel's LGA-1366 Socket**

GELID's LGA-1366 Mounting Clip enables Silent Spirit to fit Intel's LGA-1366 socket

**HONG KONG, 06 January, 2009**

Thermal Solutions specialist *GELID Solutions* launches a *LGA-1366 mounting clip* which enables the quad heatpipe silent mid-range CPU cooler *Silent Spirit* to fit Intel's LGA-1366 socket.

Thanks to the light weight of just 370g the Silent Spirit will not strain the socket and will allow for safe transportation.

The Top-flow cooler *Silent Spirit* follows an open frame concept whereby both design and dimensions have been improved to eliminate humming and buzzing noises while maintaining a compact overall size. Precise software calculations were made during the development stage to simulate both airflow and cooling performance in order to create a prototype that would live up to the expectations of a true silent aficionado. In order to cool down the Northbridge heatsink (chipset) and surrounding voltage regulator module close to the CPU, the heatsink has been tilted specially to an angle for this purpose. Unlike other top flow coolers this unique feature stops hot air from accumulating beneath the heatsink. The 92mm fan has been chosen for silent operation and high airflow and comes with an intelligent PWM control to allow users to set the fan speed in their BIOS accordingly. In addition the anti-vibration fan mounts are made of high quality rubber thus guaranteeing a long life span even during high temperatures. Besides the Intel LGA-1366 socket the cooler is compatible also to Intel LGA-775 and AMD 754/ 939/ 940/ AM2/ AM2+ sockets, is RoHS and WEEE conform and has warranty of 5 years.

*"Our LGA 1366 mounting clip will future proof the Silent Spirit for Intel's Core i7 CPUs", said Gebhard Scherrer co-founder and Sales Director of GELID Solutions Ltd.*

**The GELID 1366 Mounting Clip is available and has a MSRP of USD 4.99 or Euro 3.99.**
