Launch “ICY VISION-A” AMD™ 7950 & 7970 VGA Cards

Compatible to AMD™ HD5850 / HD5870 / HD6850 / HD6870 / HD6950 / HD6970 / HD7850/ HD7870
HD7950 / HD7970

HONG KONG, 1st June 2012

Thermal Solutions specialist *GELID Solutions* expands its multi-award winning “*ICY VISION*” VGA Cooler on the latest graphic cards of AMD™ (reference board of HD 7950 & HD 7970). This new product is dedicated exclusively to AMD™ VGA cards.

The “*ICY VISION-A*” cooler contains 5 power heatpipes in a unique heatpipe constellation. The heatpipes are interlaced into 85 optimized high-quality Aluminium fins. Together with a flat stack fin soldered Copper base, they enable the most efficient heat transmission and dissipation from GPU core in its class.

Besides the heatsink, two 92mm UV-reactive fans with 11 blades in S-shape generate 20% more air flow than traditional fans. The fan contains a high-quality ball bearing to ensure a longer lifetime in high temperature environments.

The “*ICY VISION-A*” is CrossFire™ and compatible on a number of cards. More RAM and Voltage Regulator Module (VRM) heatsinks are included to cool down the components around the GPU. The high performance GC-2 thermal compound is also included in the package.

The “*ICY VISION-A*” VGA cooler is available now and has a MSRP of USD 55 or Euro 46.

This cooler is RoHS, WEEE conform and carries a 5 year warranty.
