“Patch Cable Cat. 7”
Ultra Speedy Lan Cable with Broader Bandwidth and Latest Technology

HONG KONG, 31 October 2014

Thermal Solutions specialist *GELID Solutions* adds *Patch Cable Cat. 7 (SSTP)* to its *GAMER* product portfolio.

The Patch Cable Cat. 7 with a bandwidth of 600 Mhz offers upto 240% larger bandwidth and with a speed of up to 10Gbps it is 10 times faster than the current Cat 6 cable. Thanks to the latest technology this cable reduces also data loss and errors during data transmission and has 26 AWG copper wire conductor. Further it also contains a LSZH jacket intended for applications where both low smoke and Halogen free products are needed. Low smoke zero halogen cables reduces the amount of toxic and corrosive gas emitted during combustion. The patch cable comes with a gold plated connector on each end which prevents oxidation of the connector under moist condition even during a long period of time.

“If you are networking at gigabit speed and beyond, having the right cable is a must,” said Gebhard Scherrer Sales Director of GELID Solutions Ltd.
