

For immediate release

Launch of “POLAR” – CPU Cooler

1U Low Profile cooler for Intel™ CPU

HONG KONG, 3 July 2015

Thermal Solutions specialist *GELID Solutions* unveils the latest 1U low profile cooler for Intel™ CPU. The *POLAR* CPU cooler is a product of *GELID Solutions* SILENT product line.

The *POLAR* is designed for HTPC, Panel PC, Car PC and 1U Server. Heatsink height of just 27 mm fits most slim low profile cases. The *POLAR* also has an improved heatsink fin configuration to achieve high cooling performance in a compact design. The cooler weighs only 127 g and especially conforms to lightweight Panel PC and Car PC applications.

A silent 75mm frameless fan with the intelligent GELID PWM (Pulse Width Module) control was chosen to be integrated into the heat sink. The fan blades were optimized and with a fan speed of min. 1400 rpm it guarantees a high airflow. The intelligent GELID PWM control keeps the fan silent but accelerates the fan speed whenever additional cooling is needed. The multi-award winning high performance GC-2 thermal compound is already pre-applied on the heatsink. The *POLAR* is compatible to Intel™ Celeron™, Pentium Dual-Core™, Core i3™ and Core i5™ CPU with TDP 65W. The cooler fits multiple Intel™ CPU sockets such as LGA 1150, 1155 and 1156.

The cooler is RoHS and WEEE conform and carries a 5 year warranty.

“Our POLAR CPU Cooler is a true masterpiece of technology in a compact design. It’s slim, lightweight and silent (screws instead of pushpins)”, said Gebhard Scherrer co-founder and Sales Director of GELID Solutions Ltd.

The *POLAR* CPU cooler is available now and has a MSRP of USD 14 or Euro 12.
