

For immediate release

Launch of “Slim 12 UV Blue” & “Slim 12 PL Blue” – Fan

Silent Slim UV Reactive 120mm Fan & Silent Slim 120mm Fan with PWM and LED with High Air Flow

HONG KONG, 25 October, 2012

Thermal Solutions specialist *GELID Solutions* reveals the “*Slim 12 UV Blue*” and the “*Slim 12 PL Blue*” fans of its GAMER product line.

Engineers at *GELID Solutions* go slim and have created two slim profile fans (120x120x15.8mm) with surprisingly high cooling performance.

The “*Slim 12 UV Blue*” fan comes with an UV reactive blue impeller and has a fixed rpm speed of 1500. The “*Slim 12 PL Blue*” also comes with a blue impeller but includes a high-quality PWM control for a rpm range of 900-1600. Additionally the “*Slim 12 PL Blue*” includes 4 blue LED lights and an on/off switch mounted on the frame of the fan. Although both fans generate high air flow, they are very silent. The “*Slim 12 UV Blue*” has a start voltage of only 5 volts and 7 volts for “*Slim 12 PL Blue*” to start. The “*Slim 12 UV Blue*” has a 5-year supplier warranty and because of the LED lights the “*Slim 12 PL Blue*” has a 3-year warranty.

Both fans are RoHS and WEEE conform.

“*The trend is to go slim. We have tried to combine slim design with high performance and we have achieved more than we have expected*”, said VC Tran, Marketing Director of GELID Solutions Ltd.

Both fans are available now for a MSRP of USD 8.60 /6.60 Euro (*Slim 12 UV Blue*) and USD 12.85 / EUR 9.90 (*Slim 12 PL Blue*).
