Launch of "Slim Silence" – 1U Slim ITX Heatpipe CPU Cooler

28mm High Slim ITX Heatpipe CPU Cooler with PWM Fan for Intel 775 & AMD AM2, AM2+ & AM3 socket

HONG KONG, 27 May, 2009

Thermal Solutions specialist *GELID Solutions* adds a 28mm high 1U Slim ITX heatpipe CPU Cooler with PWM fan to its popular line of Silent CPU coolers.

With a compact heatsink design for Mini ITX, Micro ATX, ATX, HTPC, Panel PC, Car PC and 1U server the *"Slim Silence"* is equipped with a high performance heatpipe and a silent fan.

The high performance heatpipe ensures a fast and efficient heat transfer from core to aluminium fins. The frameless silent fan includes a ball bearing and a GELID intelligent PWM (Pulse Width Modulation) control which ensures a silent operation at low CPU temperature and accelerates the fan speed when necessary.

The *"Slim Silence 775"* is compatible to Intel 775 while the *"Slim Silence AM2"* is compatible to AMD's AM2, AM2+ and AM3 socket. Both coolers support CPU thermal design power (TDP) up to 65W with a good case ventilation. The *"Slim Silence"* series is RoHS and WEEE conform and has a warranty of 5 years.

"Small Form Factor PC's are growing in popularity; these small systems need small and silent cooling. It's the best time to launch a thermal solution such as Slim Silence which fits both requirements at the same time", said Gebhard Scherrer co-founder and Sales Director of GELID Solutions Ltd.

The *"Slim Silence 775"* has a MSRP of USD 22.50 / Euro 16 and the *"Slim Silence AM2"* has a MSRP of USD 21 / Euro 15. Both models are available in June 2009.
