Launch of “SnowStorm” – CPU Cooler

Triple Powered Heatpipes CPU Cooler

HONG KONG, 26 September 2014

Thermal Solutions specialist *GELID Solutions* unveils its latest CPU cooler “*SnowStorm*”. The cooler contains an optimized compact heatsink with 3 power heatpipes and a 92mm fan with PWM function. The cooler is a product of *GELID Solutions* SILENT product line.

In comparison to other mid-end CPU coolers the “*SnowStorm*” is built with a unique fin architecture which distributes air flow equally into the heatsink. Thanks to the 3 power heatpipes with Direct Touch Technology (HDT) this compact cooler achieves unexpected cooling performance. Its compact heatsink size makes it light and with the metal back plate the mount is much more secure than with the traditional mounting. The 92mm fan contains an intelligent PWM fan control which ensures a silent operation at low CPU temperature and a fan speed acceleration when the CPU temperature climbs higher.

The cooler is RoHS and WEEE conform and carries a 5 year warranty.

“*Sometimes size does not matter, small but powerful like our SnowStorm cooler*”, said VC Tran Managing Partner of GELID Solutions Ltd.

“*SnowStorm*” is available now and has a MSRP of USD 27 or Euro 21.
