Launch of “WING UV Blue” Case Fan

Blue Case Fan Series with Unique Bearing for Gamer Enthusiasts

HONG KONG, 19 November, 2008

The **WING UV Blue** series (*fans size in 80, 92 and 120 mm available*) for gamers and modders features a unique Nanoflux bearing whose motor bearing is not only water - and dustproof but also allows the impeller to be removed for cleaning. The fan blades winglets were designed to achieve larger airflow, greater static pressure and are UV reactive. Even the slightest vibrations generated by the running fan will be absorbed by 4 Anti-vibration fan mounts which replace the traditional screws. A voltage regulator allows the user to adjust the fan speed between 5-12 Volts as desired.

The patented *Nanoflux* bearing (*NFB*) incorporates a clever magnetic design, very high precision manufacturing and runs friction-free and operates noiseless. Electromagnetic fields are exploited to keep solid parts from touching. The load is carried by a magnetic field. The Nanotechnology composite ensures lowest abrasion and extreme durability (MTTF 100'000 hours). Compared to other Magnetic bearings this technology allows the impeller to be detached and thus the fan blades can be cleaned easily. The nano composite material is self lubricating and even waterproof. Compared to sleeve and ball bearing the high precision self-lubricated material of GELID's Nanoflux bearing eliminates oil leakage.

“We have created this fan series for Modders, Gamers and Overclockers looking for best in class both in terms of noise and performance” said Gebhard Scherrer co-founder and Sales Director of GELID Solutions Ltd.

MSRP	USD	Euro
WING 8 UV Blue	12.50	8.35
WING 9 UV Blue	13.50	9.00
WING 12 UV Blue	16.40	11.00

All fans are RoHS and WEEE conform and carry a 5 year warranty.
