Launch of “SlimHero” – CPU Cooler

Multi-Compatible Low Profile CPU Cooler for Intel™ & AMD™

HONG KONG, 9 April, 2013

Thermal Solutions specialist *GELID Solutions* unveils the *SlimHero* which is a low profile CPU Cooler of its *SILENT* product line.

The “*SlimHero*” features 4 sintered power heatpipes with a silent and slim 120mm fan. The copper heatpipes ensure maximum heat transfer from CPU to the aluminum fins. The heatsink is built in a unique shape to lower the air flow resistance. The cooler can be mounted on each directions of the AMD™ socket.

The low profile cooler “*SlimHero*” is especially designed for compact PC cases where space can be the key problem. With a total height of 5.9 cm this cooler can fit almost all smaller cases and is able to cool up to 136W (TDP).

The heatsink is bundled with a silent and slim 120mm fan with high airflow. The fan comes with an intelligent PWM control which allows users to set the fan speed in their BIOS accordingly.

The cooler is compatible to Intel™ 775/ 1155/ 1156/ 1366 (LGA 1155) and AMD™ AM2/ AM2+/ AM3/ AM3+/ FM1/ FM2 sockets, is RoHS and WEEE conform and has warranty of 5 years.

“A Mini-PC provides entertainment in today’s living room and a powerful but silent low profile cooler such as the SlimHero makes it happen,” says VC Tran, Marketing Director of GELID Solutions.

The “*SlimHero*” is now available and has a MSRP of USD 32 or Euro 25.
