**Launch of “STELLA FROST” – Case Fan**  
120mm Dual Ring ARGB Fan

HONG KONG, 7 May 2021

Tech innovator *GELID Solutions* unveils the latest 120mm case fan featuring the Icy Frame Assembly and sophisticated Addressable RGB (ARGB) LED lighting. The *STELLA FROST* is a product of GELID Solutions GAMER product line.

The *STELLA FROST* introduces a perfect mixture of vibrant design and top-notch cooling technologies. It comes with 8 hub-mounted ARGB LEDs and 16 frame-mounted independent ARGB LEDs to illuminate stylish *Dual Ring Lighting* and create spectacular RGB effects amplified by the highly reflective *Icy Assembly* and tidy all-white frame. The fan also boasts *Double Ball Bearing* which adds to improve mechanics and ensures ultra-durable functioning. The new impeller brings an optimized blade profile to deliver enhanced cooling. And the carefully designed PWM IC, a core part of the *STELLA FROST*, eliminates any clicking noise. Additionally, the intelligent GELID PWM (Pulse Width Module) drives the fan in the extended speed range from 500 RPM to 1600 RPM, it constantly keeps the fan silent but accelerates speed whenever higher airflow is needed. The *STELLA FROST* also bears dual ARGB cabling with a male-plug adapter integrated to facilitate connection of multiple fans in your system.

The fan is RoHS and WEEE conform and carries a 3 year warranty.

*“STELLA FROST is crafted for gamers, modders and RGB enthusiasts. Supercharged with frosty design, spectacular RGB lighting and robust mechanics, it helps fine-tune your gaming rig and make it cool and shiny”*, said Gebhard Scherrer, Sales Director of GELID Solutions Ltd.

The *STELLA FROST* is available now and has a MSRP of USD 10.99 or Euro 9.99.
